## PREFACE

---

TX 813

AGRIC.  
LIBRARY

It has been quite fitting that a date cook book should originate in Coachella Valley, the American home of the date.

I feel that the time is not far distant when dates will be used universally both in the fresh state and in various modes of cookery.

In its use sugar is conserved, as will be seen in the following number of recipes which need no sugar, and by others which require a smaller amount than has before been used.

Although the compilation contains many of the so called "fancy dishes," a still larger number of simple and wholesome rules may be found in its pages.

Dates are a product which perhaps lend themselves to a greater variety of uses than any other one article of food, and, consequently, I trust a book devoted exclusively to their service will find favor with all those who desire a more extended acquaintance with this most delicious fruit. M. S. M.

## FOOD VALUE OF THE DATE

---

In the arid regions of the old world dates always have been an essential in the dietary, and in some parts have been used even to a greater extent than bread and potatoes here.

Owing to its compact form and almost total availability as food the date is a natural tabloid form of nourishment, and some kinds even outstrip the much vaunted pre-digested foods. These latter dates contain sugar in a form immediately available by the body through simple absorption without being subjected to the digestion that ordinary sugar undergoes.

Dates are at once an enjoyable confection and a substantial energy producer. They really contain all the elements that a balanced diet calls for, protein, fats, salts and carbohydrates and all in available form for the human system.

One pound of dates has a caloric value of 1,275, a calorie being the physiological heat unit or unit of potential.

CHARLES BENNETT, M. D.

## SOME OF THE WAYS DATES ARE USED BY THE ARABS

---

Split date, remove seed and then fill cavity with unsalted butter. This manner of eating the date has been popular throughout the Arabic world for centuries.

Another popular combination, and used by the missionaries as well as the Arabs, is called khabis, and is a mixture of dates, butter and honey.

Sour or curdled milk in various forms is a constant accompaniment of dates. It may be from this that we get our idea of the use of cottage cheese with dates.

Fresh milk, especially that of camels, is considered a particularly fitting drink after a meal of dates.

In the Sindh desert of India, onions are considered the proper accompaniment.

In districts where locusts or grasshoppers are obtainable, these insects are roasted and pounded to a paste, together with fresh dates.

Madquqeh, a date paste, made by pounding dates with sesame oil, is used on their tasteless bread.

Dates are also used cooked, the best being a plain fry in plenty of butter; the date for this purpose should

be soft, and great care is needed to keep them from burning; but if properly prepared, they rarely fail to please the American palate.

Fresh dates are baked in the oven, sometimes basted with butter.

Another standard Arab recipe is to chop up the dates, and boil them in milk often with the addition of chopped onions and a flour thickening.

There are also many ways in which dates are used as beverages, and in the making of jams and preserves.

In the Sahara dates are added to meats, soups and stews. Are used to make syrup which sells for ten cents a quart.

Seeds are used in cookery after being softened with milk, and are also made into bread.

# CONFECTIONS

“Sweets to the Sweet”

## Bon-Bon Cream

5 pounds of sugar  
6 drops acetic acid

1½ pints water

Put sugar and water in a kettle, and set on a hot stove, stir till well dissolved. Just before it boils splash it up on the sides of the kettle to wash down the undissolved sugar, then wipe sides of the kettle with a damp cloth. Now put in acid, and cover and steam for a few minutes. Remove cover, and put in the thermometer, and cook to 240 degrees. Pour out and cool quickly. When perfectly cold, work it, and set away with a cloth over it wrung out of cold water.

Do not stir after it begins to boil.

## Chocolate Dainties

Put through a meat chopper ½ cup each of dates, figs and nut meats. Add 1 tablespoon orange juice and a little grated orange peel, and 1 square of melted, sweetened chocolate.
